NSELED MOBILE LED WALL TRAILER

Mobile LED screen trailer is a ready-made solution for LED screen rental professionals.

This low and stable platform can be used as a small stage or a podium. It can accommodate screens up to 28 square meters, covered by a tent for transportation.

The CE certification ensures that the product complies with current European regulations.

PLATFORM LED DISPLAY TRAILER

Easy to move

Our mobile LED video trailer is easy to transport - just attach the drawbar to a vehicle and it's practically a mobile billboard.

One-person operating system

It requires only one person to operate - towing the trailer, setting up the LED screen and operating the screen - no help is required.

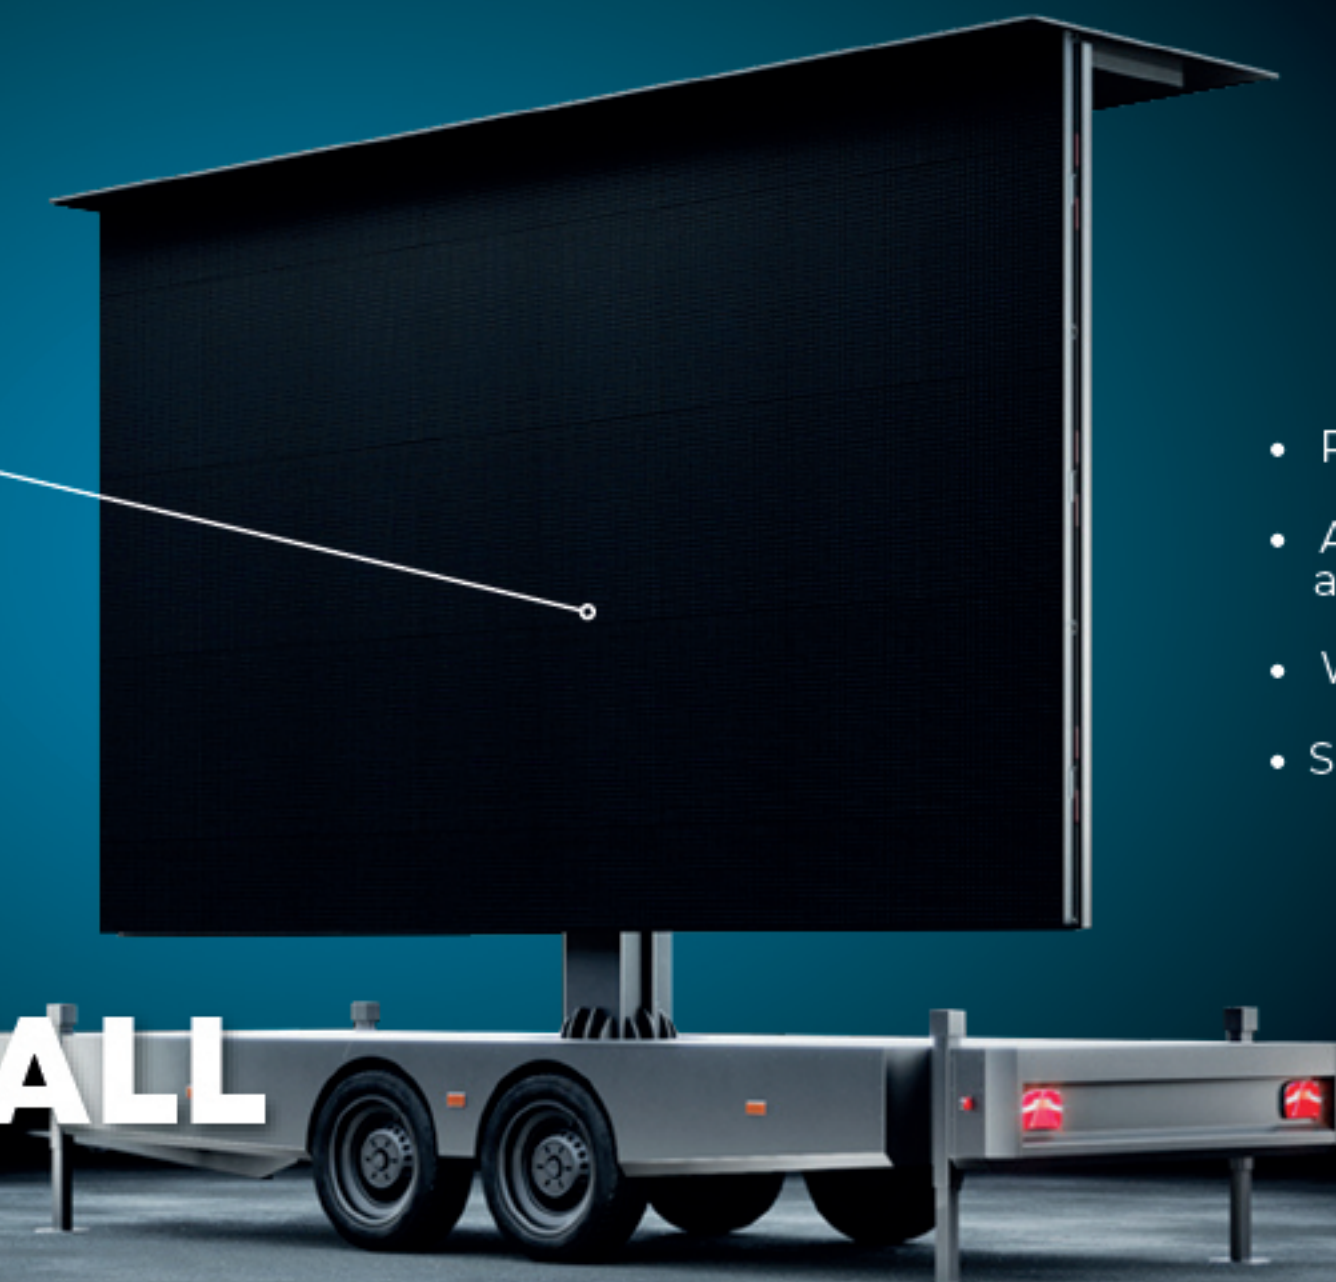

Platform included - 15 mins to set-up

Additionally, no platform is needed to set up the LED screen. Because of this, our mobile LED trailer solution saves money and time.

The trailers are equipped with LED screens of guaranteed NSELED Europe quality.

NSELED trailers mount 3.91 pixel pitch outdoor ledwall modules

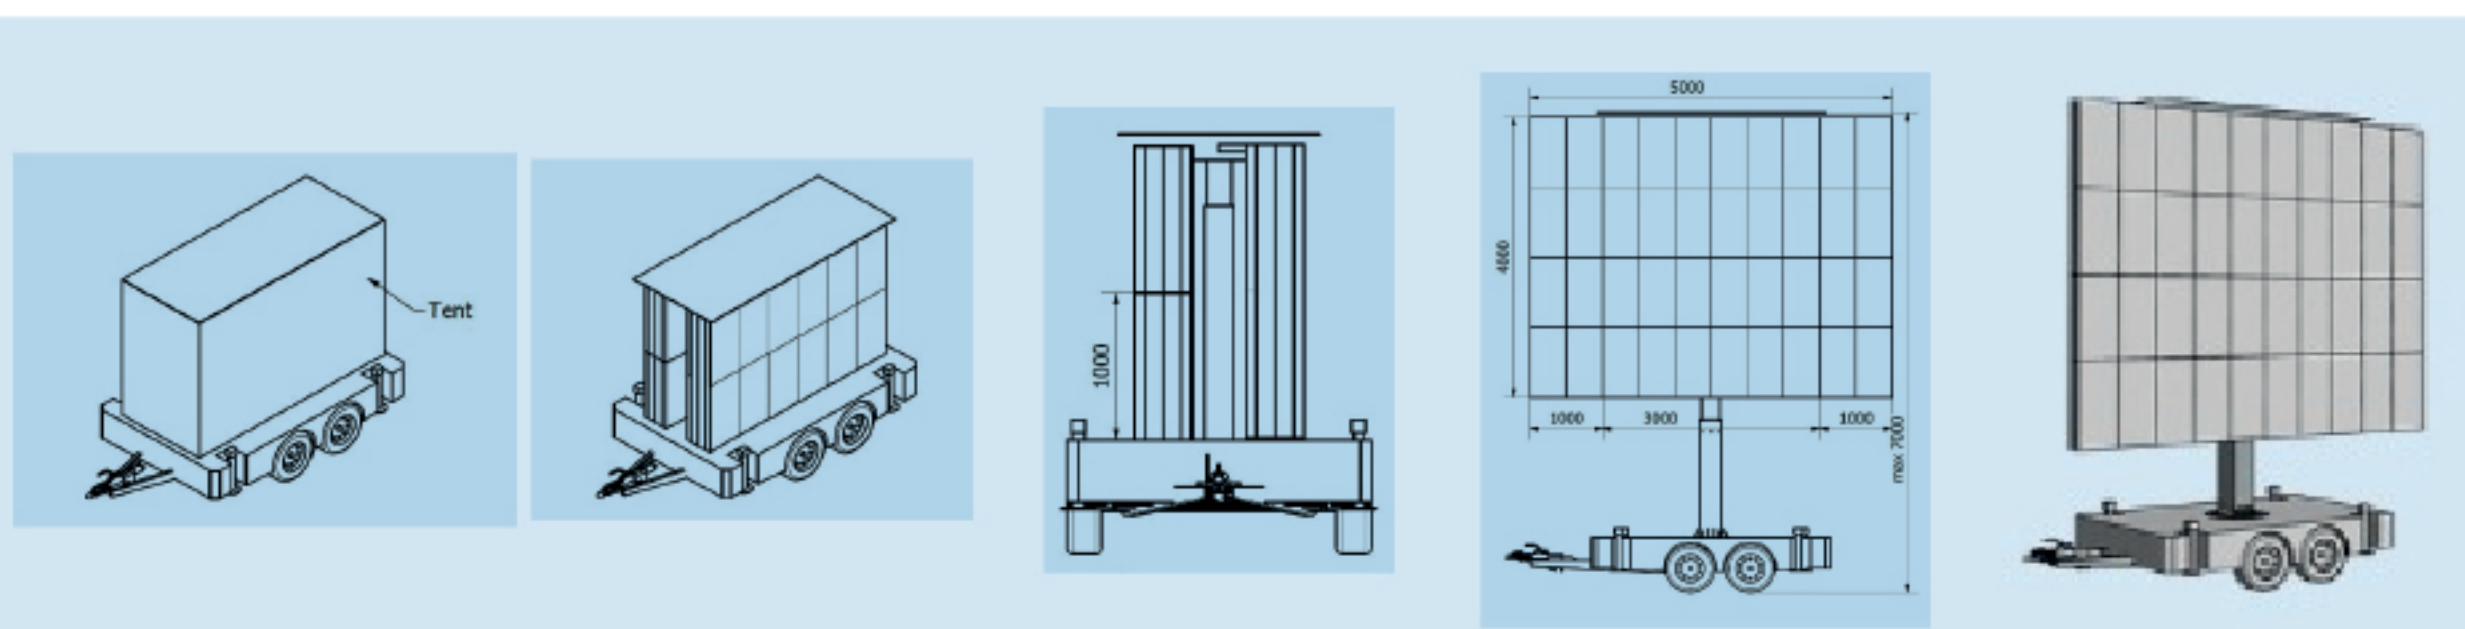

- Remote controller
- Automated rotation and folding
- Wind sensor
- Sound system

NSELED MOBILE LEDWALL TRAILER

Static calculations and structural analysis are done by engineers from Kaunas University of Technology. NSELED trailers can accommodate LED screens up to 28 square meters and withstand winds up to 15 meters per second.

Mobile LED screen trailer has 3 different powering options:

Standard set has 16A or 32A electric socket included to power the screen and hydraulic mast. Optionally, we can add a super silent diesel generator. Or you can choose to add a battery to the mobile LED screen trailer, which is enough to power the screen for a few hours. With these features, the LED trailer will work in remote locations.
